

DRAIN CARE *Solutions*

State **A-SALT™**

- Targets uric salt build-up in drains
- Cuts through calcium and lime build-up
- Surface and drain line friendly

State®
Since 1911

CARE FOR WORK ENVIRONMENTS®

State A-SALT™

PHOSPHATE FREE FORMULA

A-Salt is composed of Urea Hydrochloride, an organic salt that acts like an acid, making this product surface-friendly and non-damaging to porcelain and drain lines. A-Salt is phosphate-free and contains no VOC's.

DRAIN CLEANING POWER

Drain lines are easily cleared of uric salt build-up, calcium deposits, lime build-up and even rust. It works better and faster than phosphoric acid products. Reduces odors associated with build-up.

EASY-TO-USE

Dose urinals at times when use is limited as this will allow A-Salt to work thoroughly. It will not cause any odor or fumes when working.

DIRECTIONS FOR USE:

For preventive maintenance of urinal drain lines, treat each urinal with 8 ounces of State A-Salt Urinal Drain Cleaner and let sit overnight. If using where an automatic flushing system is installed, turn water off before adding product to the urinal drain line. Some problematic lines may require more frequent cleaning. If using on waterless urinals, let 8oz sit overnight, then thoroughly rinse product through. Be sure to remove the cartridge before applying.

TECHNICAL DATA:

APPEARANCE: red/orange color

ODOR: wintergreen

SOLUBILITY IN WATER: complete

pH: less than 1

NOTE: Use caution on galvanized steel, chrome and aluminum surfaces.
