- Concentrated for industrial strength
- Cleans walls, floors, appliances, ceramic tiles, stainless steel counters, exhaust fans and much more

CARE FOR WORK ENVIRONMENTS®

# Avance Warewashing Solutions®

## CITRUS DEGREASER

### TRIPLE ACTION

Avance Citrus Degreaser's energized formula has triple the action of other cleaners: it cleans, degreases and deodorizes. Avance Citrus Degreaser bulldozes through dirt, grime and grease; deodorizes the surfaces; and washes the air of unpleasant odors, leaving a fresh, clean-smelling citrus aroma.

### HOW IT WORKS

Avance Citrus Degreaser's hard-hitting cleaning formula tackles any tough cleaning job. Specifically formulated to make even the toughest cleaning jobs easier. Avance Citrus Degreaser emulsifies grease and oil with its high-powered sequestrants, penetrants, wetting agents and detergents. Its alkaline builders chemically react and clean through a saponification process. So it even works in hard-water.

### MARKETS SERVED

Use in restaurants, offices, hotels/motels, industrial kitchens, food manufacturers, healthcare facilities and more. Safe on all metals.

### DIRECTIONS

Spray or wipe surface. Scrub or agitate. Allow to work for 2-3 minutes. Rinse with water, or wipe with a rag or sponge.

**NOTE:** A cleaning solution that is too concentrated can have a dulling effect on certain paints and inexpensive-grade varnishes and plastics. It is recommended to first try the cleaning solution on a small, inconspicuous area.

### DILUTION RATIOS

**General Cleaning:** 1:64 dilution with water (walls, windows, fixtures, steel furniture, porcelain surfaces and floors).

**Heavy-Duty Cleaning:** 1:6 dilution with water. Use for hard to clean surfaces, including heavily-soiled and greasy floors, degreasing machines, parts and equipment.

**Coil Cleaning:** 1:10 parts with water.

Please review label and SDS for all product directions, precautions and first aid information before using this product.

### TECHNICAL DATA

**APPEARANCE:** clear, orange liquid

**FRAGRANCE:** citrus scented

**pH (1:20 Solution):** 11
