Evolution Probiotic® FLOOR CLEANER

TWO-WAY CLEANING POWER

Ecolution® Probiotic Floor Cleaner utilizes two-way cleaning technology. Its surfactants cut through tough grease and soils on the surface, while its biological additives attack and digest grease and soils that have become embedded in floor grout and pores. The biological additives stay active for up to 80 hours after mopping and reactivate if wet. With routine use, grouted tile returns to its original color and slip hazards can be dramatically reduced.

VERSATILE AND ECONOMICAL

Ecolution Probiotic Floor Cleaner is highly-concentrated and can be diluted to meet all cleaning needs. It can be used with State's One Solution™ dilution system for safe, accurate and cost effective dispensing. Apply with a damp mop or through an auto scrubber machine.

Ecolution Probiotic Floor Cleaner can also be applied with a spray bottle around toilets and urinals. The biological additives will digest organic waste such as uric salts. The Morning Fresh™ fragrance is paired with an odor-neutralizer to effectively eliminate foul odors. When finished using the product, the soiled mixture can be poured into drains to help keep lines clean and odor-free.

CERTIFICATION

Ecolution Probiotic Floor Cleaner is UL Ecologo® Certified UL 2792, biologically-based cleaning and degreasing compounds. It meets the strict environmental, health, safety and performance criteria set by UL Ecologo, a third-party environmental certification program.

DIRECTIONS FOR USE

Use the following guidelines to prepare the solution for use:

General Cleaning: 4 ounces per gallon of cold water (1:32)

Heavy-Duty Cleaning: 8 ounces per gallon of cold water (1:16)

Spray Bottle Use: 4 ounces per gallon of cold water (1:32)

Please review the label and SDS on stateindustrial.com for all product directions, precautions and first aid information prior to using this product.

TECHNICAL DATA

APPEARANCE: milky, white liquid

FRAGRANCE: Morning Fresh™

DIGESTS: fats, oils, grease, protein, carbohydrates and cellulose

pH: 7-8

STABILITY: Minimum one year. Avoid extreme temperatures.
