STRIPE

Striping & Marking Paint

PROFESSIONAL LINES

With State Stripe bright vivid lines are where you need them...when you need them. Stripe parking lots, athletic fields, warehouses, factories, and anywhere a parking or safety line is needed.

LONG LASTING STRIPES

Stripe paint will mark on pavement or turf and on nonporous or porous surfaces such as gravel or dirt. Stripe paints are not water soluble and will not wash away. The non-clogging formula is ideal for parking lots, drive ways and athletic fields, as well as many indoor uses.

STRIPE WITHOUT FORMS, ROLLERS OR BRUSHES

Perfect lines are automatic with the State Striper. Simply drop the Stripe paint can into place and squeeze the trigger handle. Adjusts easily to create two to four inch wide smooth, sharp lines. The State Striper comes equipped with permanent guide indicators and a paint resistant wind screen.

DIRECTIONS FOR STATE STRIPER USE:

Please review label and SDS for all product directions, precautions and first aid information.

1. For best results, use when can is between 40° F and 90° F (4° C and 32° C).
2. Shake can vigorously for at least one minute after rattle is heard and occasionally during use.
3. Turn can upside down and place into can holder. **MAKE SURE THAT SPRAY HEAD FITS PROPERLY INTO THE HOLE.** Long side of spray head must be parallel to the axle.
4. Squeeze trigger to activate spray. To avoid any possible build-up of paint when starting, it is suggested that machine be in motion and trigger activated when passing over starting point.

NOTE: A line approximately TWO INCHES WIDE will be applied when can is in the lowest position. A line approximately FOUR INCHES WIDE will be applied when can is in the highest position. Intermediate widths will result when can is positioned between highest and lowest points.

5. After use, hold can upright pointed away from self, and press spray head briefly to clear it.

NOTE: Should spray pattern become restricted after using, remove spray head from can and clean orifice in spray head.

NOTE: If greenish appearance develops on asphalt a second or third coat may be required. Allow 30 minutes between coats. Does not exceed 66% VOC.

TECHNICAL DATA

APPEARANCE: Aerosol paint sprays; choice of yellow or white

FLASH POINT: Aerosol propellant - 10 +/- 5° F (T.O.C.)

PAINT DESCRIPTION: Modified alkyd polyester enamel

SHELF LIFE: Minimum one year

COVERAGE: One can of State Stripe will produce 360 feet of line two inches wide. This will vary slightly, depending on the porosity of the surface and on the speed of the applicator.
